

WHAT'S "WHISTLING" IN THE CARDINAL CLASS

MAY

Science

What melts in the sun?: You may have noticed temperatures increasing and daylight Getting Longer. With more sunny days it's a great time to test out what melts in the sun. All solids have a melting point, and that temperature is different for everything. We pick several items to put in the sun and see what happens.

What will happen to the raisins when you mix them with 7-Up?

Raisins are denser than the liquid in the soda, so initially they sink to the bottom of the glass. The carbonated soft drink releases carbon dioxide bubbles. When these bubbles stick to the rough surface of a raisin, the raisin is lifted because of the increase in buoyancy.

Meet Letters Tt and Jj

The children will:

We will meet the letters Tt and Jj and review all the letters we have learned to date.

The children will:

-meet Jelly Jellyfish.

-meet Tommy Turtle.

Numbers

25 and 26

We will Dance
Around the
Maypole
at Sing Time

"BIG" Word
of the Week...

Tranquil: calm, peaceful, quiet.

Jubilant: expressing or showing
joy.

ARTIST OF THE MONTH

Mary Cassatt

"Mary Cassatt was an artist who painted beautiful pictures of children and families. We study her because her paintings show us how special and important family is. She used bright colors and gentle brushstrokes to capture moments of love and joy. By learning about Mary Cassatt, we can appreciate the beauty of family life and the love between parents and children, just like in our own families."
