

WHAT'S "TWEETING" IN THE BLUEBIRD CLASS FOR

MARCH 2024

Letters of the Month

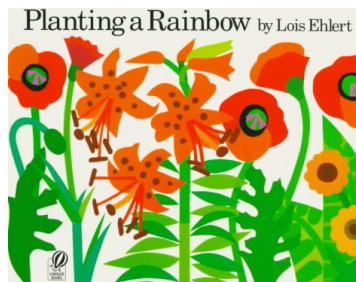

Zz, Cc & Oo

Books We Will Explore

"Planting a Rainbow" by Lois Ehlert

The children will listen to the story and discuss what happens in the beginning, the middle, and at the end. After their book discussion they will make a beautiful art project illustrating what they read.

Numbers of the Month:

17, 18 & 19

Scientist of the Month

Your Child!

All month the children will be learning about the 5 Senses. We will perform different experiments to determine which of the five senses will be used in reaching a conclusion.

The children will participate in a "Five Senses/Differently Abled" Workshop. Within the classroom, the children will visit different stations: each exploring the five senses. They will also learn to appreciate and accept that some children and adults have different abilities. Some of these activities include creating their own words in "Braille" and playing basketball in a wheelchair to understand that people with handicaps can do many of the things that they can do, they just do it differently!

Shape of the Month: Shamrock

The children will create their own shamrocks but cutting out other shapes. They will cut out small hearts to create the leaves and a triangle to create the stem.

St. Patrick's Day

On the day your child celebrates St. Patrick's Day at school we ask you to dress him or her in something green! Sometime during the day the silly Leprechaun will sneak into the classroom while the children are out of the room, where he will do a little "harmless mischief" (put the books upside down, put the trash can on the table, leave a mess of toys on the carpet, etc.). The leprechaun will "run" out of the classroom and leave his green footprints in the hallway for the class to follow. The footprints will lead the children to a "pot" filled with a surprise! I wonder what it will be??

The Bluebirds will also make their own Leprechaun in a cup complete with "green hair"!
